

**08/14/05 - Thanks to St Joseph's School**

Thanks to St Joseph's School children, teachers and parents for their letter of appreciation for the help given on their plot. The photos of the children proudly displaying their first harvest were delightful and will be displayed at the next WASHa meeting. Here's an extract from the note:

"Thank you and all our allotment friends for your help this far. We have been up to our plot with the children and watered and harvested. the beetroot and potatoes were cooked for the children to taste and of course, peas straight from the pod! It was fantastically successful and we think the children will remember it all their lives. There is a watering rota organised until the end of summer and we will be back first week in September. The beans are in and we will harvest as we go. Parents have donated £18 towards seeds and tools for next year."

Attention all those newcomers to the top of the high path who were hoping to use the one remaining tap on the top supply line! The stop cock has been removed and the pipeline dug up. So much for encouraging allotmenting!
